***Response to Amendment***

The following is in response to the amendment filed on August 9, 2004.

***Allowable Subject Matter***

Claims 1-3 and 5 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-3 are allowed, because the prior art does not disclose or suggest an apparatus comprising at least a first muffle tube and a second muffle tube arranged coaxially within a surrounding furnace body, both muffle tubes having a hollow cylinder, cover member, and bottom member, and whereby the second muffle tube surrounds the entire circumference of the first muffle tube and forms an intermediate room in between. Similarly, claim 5 is allowed because the prior art does not disclose or suggest a method of dehydrating and consolidating an optical fiber preform in an arrangement having at least the above features.

***Response to Arguments***

Applicant's arguments filed on August 9, 2004 have been fully considered and are persuasive with respect to the rejections set forth previously based on prior art references Tsuchiya (US 5,114,338) and Ohga (US 5,259,856).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Koaizawa et al (US 6,543,257)

Tsuchiya et al (US 5,470,369)

Ishikawa et al (US 5,106,401)

Kyoto et al (US 4,969,941)

Brown et al (US 2002/0005051)

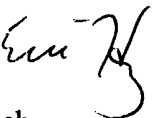

All disclose various muffle tube arrangements for dehydrating/consolidating an optical fiber preform.
